

MONTANA FISH AND WILDLIFE COMMISSION AGENDA ITEM COVER SHEET

THE **OUTSIDE** IS IN US ALL.

Meeting Date: April 22, 2021

Agenda Item: Stimson Lumber Recreational Access Agreement, R1

Action Needed: Proposed

Time Needed on Agenda for this Presentation: 15 minutes

Background: A biennial rule for the 119,761-acre Stimson Lumber Company Recreation Management Area was previously established by the Fish & Wildlife Commission in August 2019. Prior to the initial biennial rule approval in 2019, FWP worked closely with Stimson Lumber Company to develop a joint proposal for managing public recreation on their privately-owned timberlands in FWP Administrative Region 1. The renewal of this biennial rule would perpetuate year-round recreational access for public use for an additional two years.

Public Involvement Process & Results: Public notice of the rules and a public comment period will begin if the commission approves the proposed rules.

Alternatives and Analysis: Managed public access will help reduce the resource damage, vehicular damage to soils and vegetation, and excess disturbance to native wildlife including threatened and endangered species. Without these rules, Stimson Lumber Company may be forced to increase restrictions on public use and ultimately close these lands to public access.

Agency Recommendation & Rationale: FWP recommends the commission propose this rule for public comment.

Proposed Motion: I move that the commission propose biennial rules regarding public use of the Stimson Lumber Company Recreation Management Area.
