

Elk and Deer – HD 101

Draft Changes for 2022-2023 Hunting Regulations (boundary types, LPT changes, species, etc.):

Boundary Change: Combine Hunting District 101 and HD 109. The new combined district would be identified as HD 101. Change the boundary between HD 101 and HD 103.

Mule Deer: Keep the 3-week general, 2-week limited permit mule deer regulation for the new HD 101.

Elk: Antlerless elk shoulder season opportunity would reflect new hunting district number.

Biological Implications:

Mule Deer: This could allow for consistent mule deer management in the district and reduce hunting pressure on mule deer bucks.

Social Implications:

This would simplify regulations by reducing the overall number of hunting districts in the region. The boundary change between HD 101 and HD 103 would be better defined and easy to identify. Sportsmen/women would likely be divided over the mule deer regulations.
