

Elk and Deer – HD 130

Draft Changes for 2022-2023 Hunting Regulations (boundary types, LPT changes, species, etc.):

Elk: Eliminate the limited draw antlerless elk permit (130-00) in this district.

Deer: Eliminate the limited draw antlered mule deer buck permit (130-50) in the Mission Mountains portion of this district.

Biological Implications:

Elk: There is a small elk herd in this district. No biological justification for maintaining this limited number of permits (5).

Deer: No biological justification for maintaining this limited number of permits (10).

Social Implications:

This would simplify regulations by reducing the number of license types. Some loss of hunting opportunity would result. Sportsmen who like the limited permit area may not agree with loss of the permit area.
