

# Antelope – HD 388

## **Draft Changes for 2022-2023 Hunting Regulations:**

Retain Hunting District 388 boundary, season structure, and all license/permit types except for the pronghorn antelope doe/fawn license, 388-30, offered through a drawing, which is recommended for elimination.

## **Biological Implications:**

For eliminating the pronghorn antelope doe/fawn license, 388-30: overall pronghorn numbers are declining in the valley, along with decreasing functional habitat, and opportunities to effectively pursue pronghorn are limited and are mostly on private land.

## **Social Implications:**

This would change the antelope licenses offered for HD 388.

## **District biologist:**
