

# Moose – HD 380

## **Draft Changes for 2022-2023 Hunting Regulations:**

Change the Hunting District 380 moose boundary to match the new HD 380 deer/elk boundary, which removes the portion of land between U.S. Highway 287 and the Missouri River from HD 380. The portion removed would become part of the new moose HD 312.

## **Biological Implications:**

Moving the HD boundary from the Missouri River to U.S. Hwy 287 makes a better biological boundary for moose, as moose are known to move in that river corridor.

## **Social Implications:**

The boundary change follows regulation simplicity directives to have similar boundaries between species where possible.

## **District biologist:**
