

Deer – HD 421

Draft Changes for 2022-2023 Hunting Regulations: MD: Either-Sex general season district wide.

Biological Implications: With the combination of HDs 421 and 423 into new larger HD 421, makes a consistent regulation as the two HDs previously had differing buck regulations. Either Sex regulation would reflect Adaptive Harvest Management guidelines. Would remove unnecessary buck only limitation on USFS land in extreme west portion of HD.

Social implications: Simplifies Regulations
