

## **Draft Changes for 2022-2023 Hunting Regulations:**

- Boundary change
  - The portion of HD 412 south of Hanover Road would become part of HD 419

## **Biological Implications:**

This possible change does not have anticipated positive or negative effects to elk in HD 419; its biological implications primarily concern HDs 412, 417, and 426.

## **Social Implications:**

Public comment pending regarding these possible changes. The boundary change is mainly to reduce the total number of HDs and license/permit types (LPTs) to simplify regulations.
