

# Moose – HD 311

## **Draft Changes for 2022-2023 Hunting Regulations:**

Rename the current Moose Hunting District 313 to Moose HD 311 to reflect the same nomenclature as deer and elk district. Minor adjustments of boundaries to align with deer and elk districts. This includes a small part of the current Moose HD 320 in the Sappington Bridge area, and a portion of the current Moose HD 308 in the Big Sky area.

The proposed Moose HD 311 (currently Moose HD 313) was included in an administrative license package with the current Moose HDs 308 and 360. Under this change, it would become a standalone district.

Total number of licenses issued would be two.

## **Biological Implications:**

The boundary changes follow regulation simplicity directives, promoting regulation simplicity and the concepts of larger hunting districts with similar boundaries between species.

## **Social Implications:**

None yet gathered.

## **District biologist:**
