

# Moose – HD 312

## **Draft Changes for 2022-2023 Hunting Regulations:**

Add portion of land between Highway 287 and the Missouri River from the current Moose Hunting District 380 into Moose HD 312. This would align with the respective proposed deer/elk HD boundary change.

## **Biological Implications:**

The boundary change follows regulation simplicity directives with similar boundaries between species. Moving the HD boundary from the Missouri River to U.S. Hwy 287 also makes a better biological boundary for moose as moose are known to move in that river corridor.

## **Social Implications:**

None yet gathered.

## **District biologist:**
