

Mountain goat – HD 326

Draft Changes for 2022-2023 Hunting Regulations:

Combine Mountain Goat Hunting Districts 326 and 327 into one new district, HD 326. Retain four licenses across the new district 326.

Biological Implications:

Mountain goats likely move across and between these areas. There is no distinct geographic boundary between them. It is likely that the Taylor-Hilgard mountain goat herd uses both areas.

Social Implications:

None yet gathered. This proposal is not expected to be controversial because similar license numbers will be retained, and hunters will have larger areas to hunt.

District biologist:

Julie Cunningham
