

# Deer – HD 565

## **Draft Changes for 2022-2023 Hunting Regulations**

- Create new district from former HD560 portion south of Falls Creek

### **Biological Implications:**

- Change driven primarily by elk.
- Low mule deer numbers, mainly summer and fall range for mule deer and white-tailed deer.

### **Social Implications:**

- Simplifies regulations by removing district portion.
- Expect this will be supported by local sportsmen.
