

Antelope – HD 321

Draft Changes for 2022-2023 Hunting Regulations:

Combine Hunting Districts 321 and 330 into one district, HD 321.

- Antelope License 321-20: Either-sex antelope; quota 500; quota range 100–1,000
- Antelope License 321-30: Doe/fawn antelope; quota 300; quota range 100–1,000

Biological Implications:

The primary justification for the recommendation is the statewide regulations simplification effort. From a biological perspective, the HD combination expands the HD to the scale that migratory antelope use the landscape and more closely align the HD with the overlapping deer/elk HD.

Social Implications:

The recommendation is expected to generate some questions and concerns about over harvest of antelope within portions of the HD. Because antelope and antelope habitat are well distributed across the proposed expanded HD, and the antelope are migratory, this is unlikely to occur. The recommendation is also expected to be acceptable to many hunters and landowners.
