

# Mountain lion – HD 320

## **Draft Changes for 2022-2023 Hunting Regulations:**

Remove the northeast portion of the Hunting District that sits east of State Highway 359, south of Interstate 90, and west of U. S. Highway 287.

- Quota: 4
- Female sub-quota: 1

## **Biological Implications:**

The primary justification for the recommendation is the statewide regulations simplification effort. The HD adjustment would align mountain lion HD 320 with the proposed deer/elk and moose HD 320, and mountain goat HD 320. The adjustment is expected to have no biological impact on mountain lions.

## **Social Implications:**

The recommendation is expected to be acceptable to most hunters and landowners.

## **District biologist:**
