Types of Impacts Identified

All routine maintenance outlined within the proposed project will take place within existing recreational trail corridors. No impacts were identified that would adversely affect the physical environment or human population.

FWP Notes:

FTBT has a MCC youth crew scheduled for a two-week hitch beginning in early August 2023. The crew will consist of two adult leaders and six youth crew members. About ½ mile of finish work was completed in October 2022, leaving approximately 5 miles of work to be finished. Considering the crew size and the low complexity of the work, this should allow ample time to finish the project.
