

END OF YEAR PROJECT REPORT/JOB PROGRESS REPORT  
FY 92: JULY 1, 1991 - JUNE 30, 1992

Division Fisheries Region 9 SBAS Project Number 3826

Project Title Statewide Fisheries Investigation - Evaluation of Fish Introductions

Federal Aid Project Number F-46-R-5 (Job VI-j)

Date Project Started: July 1, 1991 Ending Date: June 30, 1992

Objectives and Accomplishments:

1. Objective 1. To prepare environmental reviews according to the rules of MEPA for each proposed introduction or transplant of fish to waters where they do not legally exist.

Accomplishments: Environmental assessments were prepared for proposed fish introductions as follows:

- \* Rainbow trout introduction to Curtis Chamberlain Reservoir, Garfield County.
- \* Warmwater fish species introduction to Bus Reservoir, Blaine County
- \* Rainbow trout introduction to Dry Fork Reservoir, Blaine County
- \* Reintroduction of grayling to Upper Gallatin River.
- \* Introduction of largemouth bass in Jeff Bogg Reservoir,
- \* Introduction of largemouth bass in Doug Singleton Reservoir
- \* Introduction of various trout species in Ten Mile, Miner, Tahepia and Blair lakes in Deerlodge and Beaverhead Counties.
- \* Introduction of rainbow trout in Birch Creek Reservoir, Beaverhead Co.
- \* Introduction of rainbow trout in Montana Angus Ranch private pond, Carbon County.
- \* Introduction of rainbow trout in Horatio Burns private pond, Sweetgrass County
- \* Introduction of rainbow trout in Gilbert Romero private pond, Yellowstone County

2. To conduct literature reviews and analysis of survey data to determine the potential impact of introducing specific fish species in specific waters of the state.

Accomplishments:

- \* Environmental assessment of introducing smallmouth bass in Bear Paw Reservoir.
