

# SMITH RIVER STATE PARK AND RIVER CORRIDOR

## Visitor Use & Statistics Monitoring Report

2019

MONTANA **FWP**

***A summary of visitor use statistics, management activities and resource and social conditions on the Smith River corridor during the 2019 field season***

Submitted by: **Nate Kluz**

Smith River State Park and River Corridor  
Lead River Ranger (FWP)

Edited by: **Colin J. Maas**

Smith River State Park and River Corridor  
Park Manager (FWP)

Contributors:

Mark Lamonte - River Ranger (FWP)

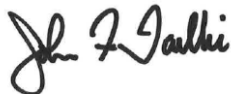

Austin Moody - River Ranger (FWP)

John Metrione - Resource Specialist (USFS)

Don Mendenhall - River Ranger (USFS)

Heather Whitley - Smith River Reservation Clerk (FWP)

Approved by:

**John Taillie**

Region 4 Parks Manager

Date:

12/03/19

## SECTION 1 - EXECUTIVE SUMMARY

### Visitation

2019 was another record setting season in terms of floater use. However, permit applications did decline for the first time since 2010. There were 10,070 private permit applications in 2019, a 4.40% decline from 2018. Despite this decline, total floater use set a record in 2019. There were 6,232 floaters in 2019, 42 more than the next highest year (2018) and 39% higher than the 20-year average. Both private and outfitted floaters set new records with 5,162 private and 808 outfitted floaters. There were 708 private float groups, 30% higher than the 20-year average and 65 outfitted groups, 38% higher than the 20-year average. No single month set a record for use in 2019, but June and July were the second and third highest on record respectively. There were 28,617 user days and 22,124 user nights in 2019, both 43% above the 20-year average. Use in April was well below recent years due to the river being closed through April 14.

### Snowpack, Rainfall and River Flows

The snowpack for the winter of 2018-2019 was statistically unremarkable, but temperatures and timely rains contributed to conditions favorable to a long float season. The snowpack for the Smith/Musselshell/Judith Basins was 36% of its median peak on New Years Day. The snowpack peaked and reached 100% of its median peak on April 09, just a few days before the median date. The difference between this year and typical years was the persistence of low and mid elevation snowpack well into the spring. Below average temperatures also contributed to an orderly burn-off of the snowpack. In early June, there was still a considerable amount of snowpack remaining in the high elevations of the Smith River headwaters (Boulder Peak, Spur Park and Elk Peak). Precipitation was below average in May and June, but well above average in July. The unique climatic conditions this year also helped cool the water. The water temperature at the streamflow gauge below Eagle Creek did not exceed 70 degrees until July 12 and only did so eight times in July and never exceeded approximately 73 degrees. Filamentous algae was present again this season, but not nearly as prevalent as in lower water seasons like 2015-2017. The algae did not present much of a nuisance for fisherman.

County Line Camp on 04/17/19

## Early Spring Conditions

The float season started slowly due to persistent ice cover on the river. It became evident in the middle of March that most of the river was still ice covered. The 120<sup>th</sup> Airwing of the Montana Air National Guard flew over the river in late March and verified that the river was unfloatable (see Cover Photo). There was some movement of ice at the end of March at readily viewable points and FWP flew the river on April 02 to see if the river was floatable and safe. Unfortunately, there were still long sections of ice-covered river, particularly between In Lieu and Rock Creek. Conditions warmed considerably over the next week and there were numerous pulses of water before reverting back to a normalized flow. Rangers floated the river on April 11 and determined there were no hazards and floating could commence. The river re-opened on April 15. Numerous camps remained closed due to icy landings, missing signs and excessive snow or overly moist conditions. These sites were progressively opened as conditions improved. Although camp signs were knocked over and many boat tie-offs were lost, the damage was not nearly as bad as in 2014. This year the ice flowed off the river in several smaller events as opposed to 2014 when the ice came off in one very large event.

Looking upstream towards Tenderfoot Creek

## Social Conditions

The qualitative social indicator which measures satisfaction levels related to “encounters with other boats while floating the river” is the basis for assessing floater satisfaction with the *overall* level of solitude on the Smith River. 95% of the floaters fell into the range of “Neutral to Liked Very Much.” There is a correlation between the number of boats seen per hour and the level of satisfaction. The average of all respondents reported seeing 1.32 boats per hour with an average satisfaction of 4.0. These results are a strong indication of high floater satisfaction with the overall level of solitude.

Most of the other statistics within this report are within similar ranges of previous years. In 2018, there was an uptick in dissatisfaction with the perception of crowding during the month of June with 54% of respondents reporting feeling crowded at Camp Baker. This perception was slightly reduced this year with 45% of respondents reporting feeling crowded at camp baker in June. The perception of crowding decreased from 2018 levels for the months of April through July at both Camp Baker and Eden Bridge.

## SECTION 2 - MANAGEMENT ACTIVITIES

### Staffing

Employees from Montana Fish, Wildlife & Parks (FWP) Region 4 and Helena-Lewis and Clark National Forest (USFS) involved with the 2019 Smith River State Park & River Corridor program included:

- Colin Maas – Smith River Manager (FWP)
- John Taillie – Region 4 Parks Manager (FWP)
- John Metrione – Resource Specialist (USFS)
- Nate Kluz – FWP Lead River Ranger (FWP)
- Mark Lamonte – River Ranger (FWP)
- Austin Moody – River Ranger (FWP)
- Don Mendenhall – River Ranger (USFS)
- Joshua Wagoner – Region 4 Maintenance Supervisor (FWP)
- Heather Whitley – Smith River Reservation Clerk (FWP)

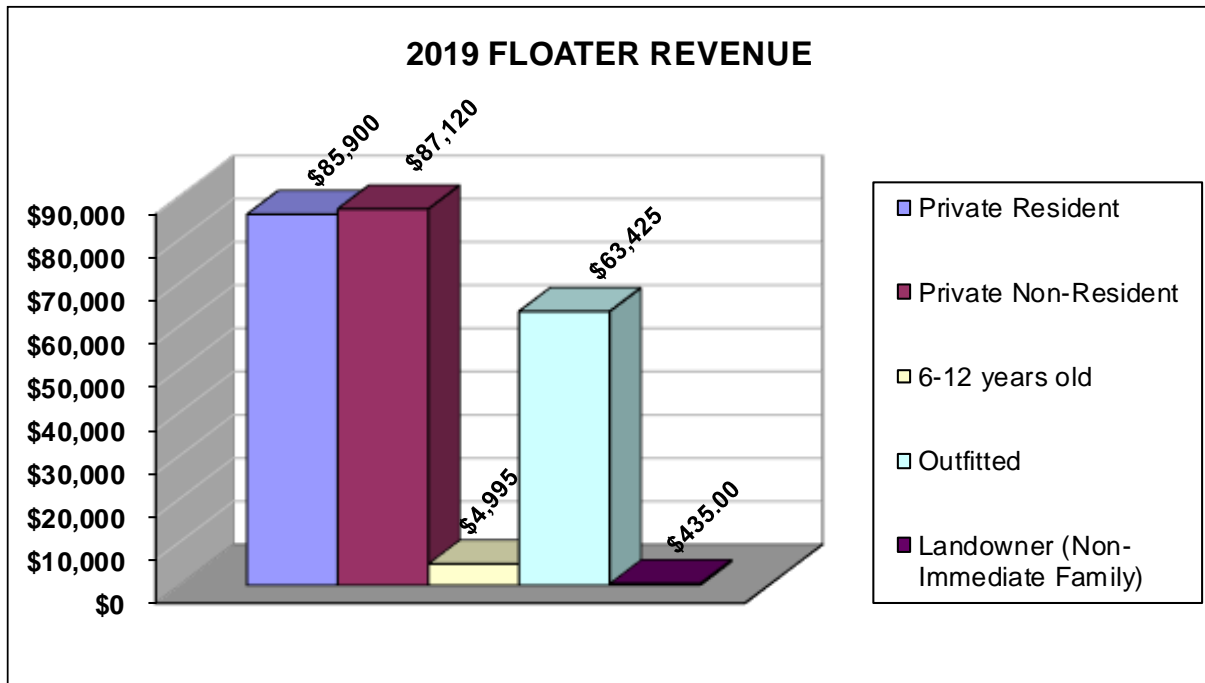

Numerous other employees from Region 4 FWP and the Helena Headquarters office, as well as individuals from the USFS, played a role in a team effort to make the Smith River State Park & River Corridor program work successfully.

The 2019 Crew: L-R Ranger Mark Lamonte (FWP), Manager Colin Maas (FWP), Ranger Nate Kluz (FWP), Ranger Austin Moody (FWP); missing is Ranger Don Mendenhall (USFS)

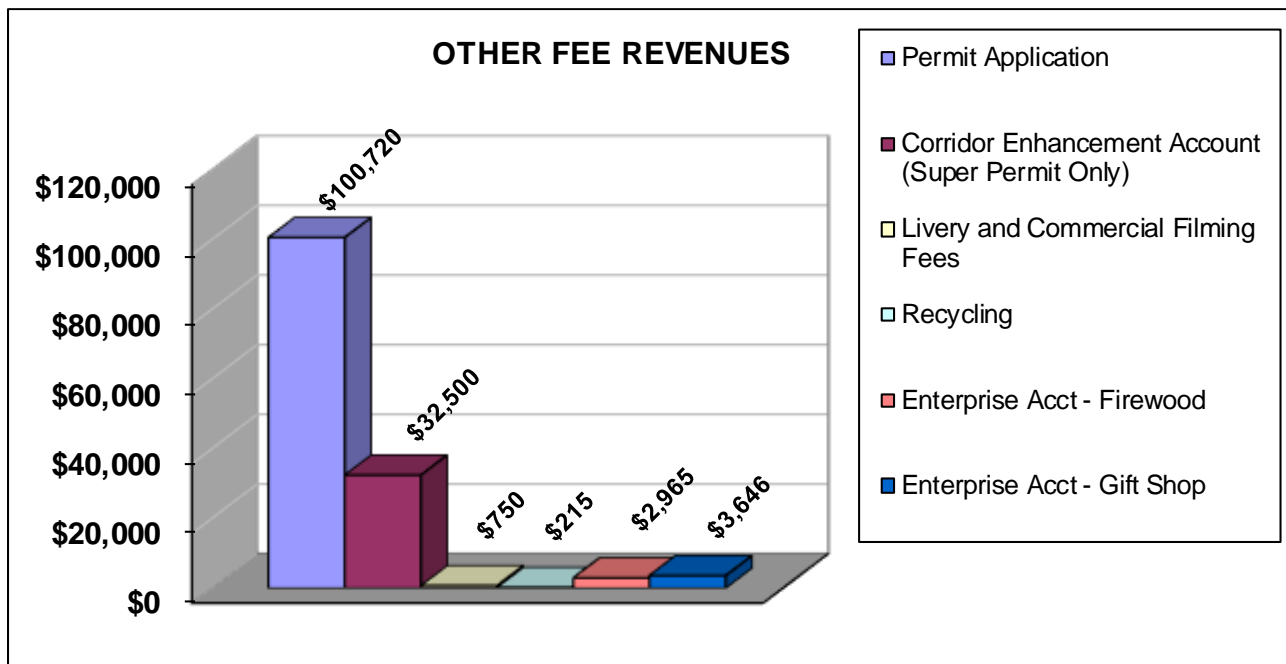

## Fee Revenue

Total “floater fee” revenue collected in 2019 was \$241,875. Floater fees revenues increased by \$1,510 compared to 2018 revenues.

**GRAPH 1: FLOATER FEES COLLECTED IN 2019**

Total “other fee” revenue collected in 2019 was \$140,796. Other fee revenues increased by \$13,857 compared to 2018 revenues.

**GRAPH 2: OTHER FEES COLLECTED IN 2019**

The following floater fees (year-round) were approved for the 2019 season by means of the Smith River State Park Biennial Rule:

- Permit application fee (residents and non-residents, non-refundable) = **\$10.00**
- Montana Resident Floaters Age 13+, Outfitter Staff = **\$25.00**
- Non-Montana Resident Floaters Age 13+ = **\$60.00**
- Children Ages 6-12 (Resident or Non-resident) = **\$15.00**
- Landowner Non-Immediate Family = **\$7.50**
- Outfitted Client Floater = **\$100.00**
- Outfitted Launch Fee = **\$200.00**
- Outfitted Transfer Fee = **\$200.00**

### **Special Projects Completed**

The following special projects were accomplished in 2019:

#### **Camp Baker**

- Extensive snow removal in late March to access site.
- Replaced hot water heater in Ranger house.

#### **Eden Bridge**

- Rebuilt hydrant at camp host pad.
- Rebuilt picnic tables in campground and stained table at camp host pad.
- Repaired fencing damaged by vehicles and wildlife.

#### **River Corridor**

- River rangers dug 36 pit latrines. 471 pit latrines have been dug in the past 14 years. The fourteen-year average is 34 pit latrines dug per year.
- Re-installed numerous camp signs that were brought down by ice. Also replaced boat tie-offs that were ice damaged or lost.
- Ranger Mark Lamonte made two river trips collecting water samples on behalf of the Department of Environmental Quality (DEQ). The samples are then analyzed to study the filamentous algae that has been a nuisance over the past few years. DEQ technicians also conducted a research float in July collecting water samples.
- Noxious weed control efforts were undertaken by the Smith River Habitat Project (SRHP) and volunteer groups. SRHP contractor West River Land Management (WRLM) chemically treated 148 acres in 2019. WRLM conducted an eight-night float trip in late June and early July with four employees and treated 78 acres. WRLM also sprayed another 73 acres via UTV in late summer/early autumn. Unfortunately, UTV spraying was cut short by the early onset of winter. The Smith River Weed Volunteers floated again in 2019 spending 173.5 hours pulling weeds and cutting seed heads. They also packed out over 300 gallons of weed seed heads. The Smith River Weed Volunteers, led by Kathy Heffernan, have volunteered for many years and have committed to do so again in the future via their participation in Montana Noxious Weed Awareness Campaigns, Adopt a Trailhead Montana program.

The Smith River Weed Volunteers at Canyon Depth

### **Administrative and Management Actions**

- Park staff closed the river to floating April 1-14 due to persistent ice throughout the river corridor. The winter of 2018-2019 was unusually cold and wet and the river accumulated ice from its headwaters to the confluence with the Missouri River. Abnormal cold delayed ice break-up. The Montana Air National Guard monitored the river during the course of their duties in March. This quality information made it clear that the river was unfloatable through March. Park staff flew the river on April 02 and the river was still unfloatable due to ice jams between Camp Baker and Rock Creek. Subsequent warm weather and rising flows cleared the remaining ice and the river was re-opened on April 15. Numerous camps remained closed until ice cleared from landings or signs and tie-offs were re-installed.

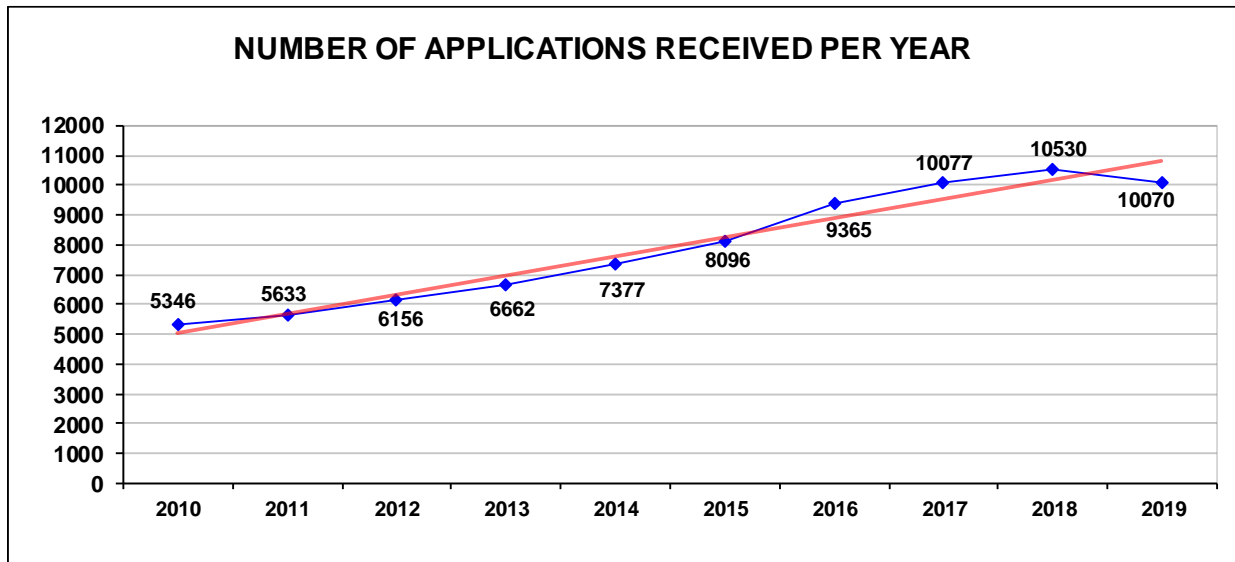

Ice Below County Line 04/12/2019

- The United States Forest Service (USFS) funded a river ranger position for the 10<sup>th</sup> consecutive year. In 2019, the USFS ranger assisted with majority of river patrols and assisted at Camp Baker with food storage rule compliance inspections.

## SECTION 3 - VISITOR USE STATISTICS

### Private Launch Applications

**GRAPH 3: NUMBER OF APPLICANTS PER YEAR**

### No-Shows

A total of 127 permit holders were no-shows. 33 no-shows occurred during the peak season (May15-July15). No-shows are restricted from applying in 2019.

### Cancellations

A total of 420 permits were cancelled. 112 cancellations occurred during the peak season (May15-July15).

### Floater Logs

334 (43%) floaters returned a floater log, of the 773 private and outfitted groups that floated .

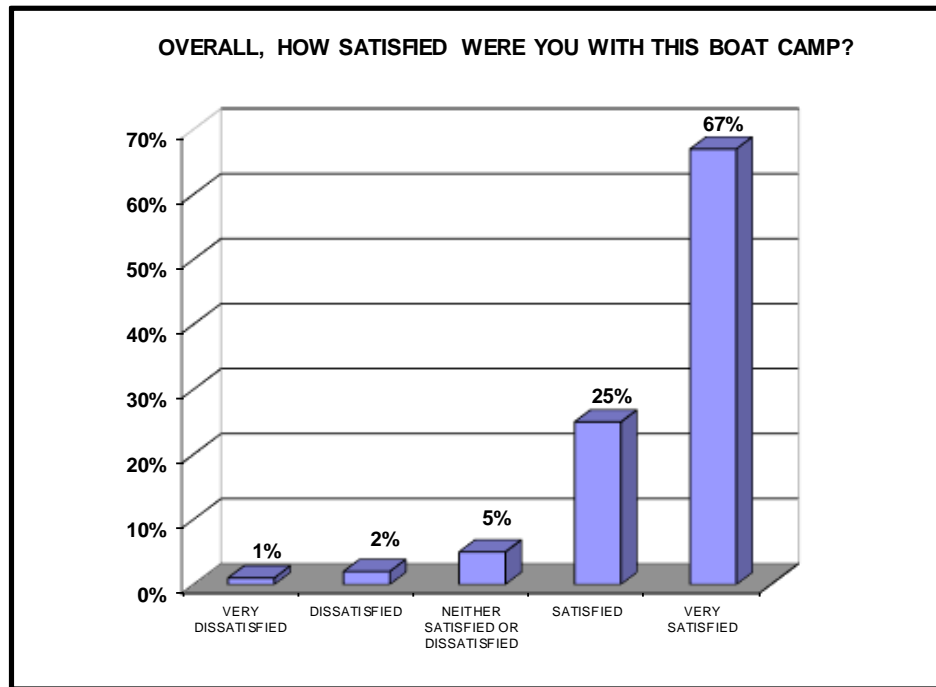

Ice Survivor

## 2019 FLOATER LOG COMMENT SUMMARY

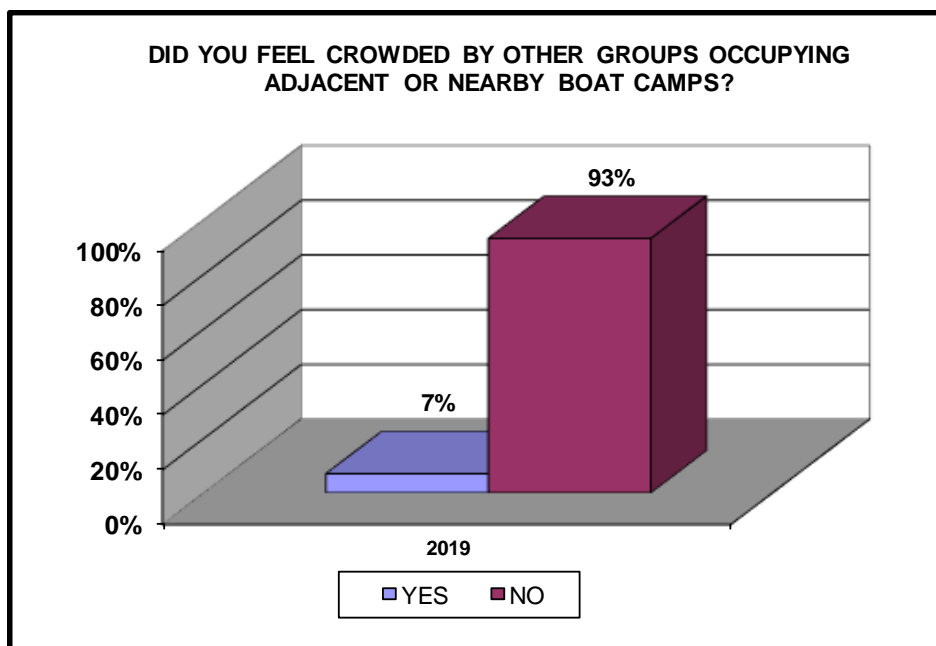

### **CAMPSITE QUESTIONS:**

**Question:** Overall, how satisfied were you with this boat camp?

**GRAPH 4: BOAT CAMP SATISFACTION**

**Question:** Did you feel crowded by other groups occupying adjacent or nearby boat camps?

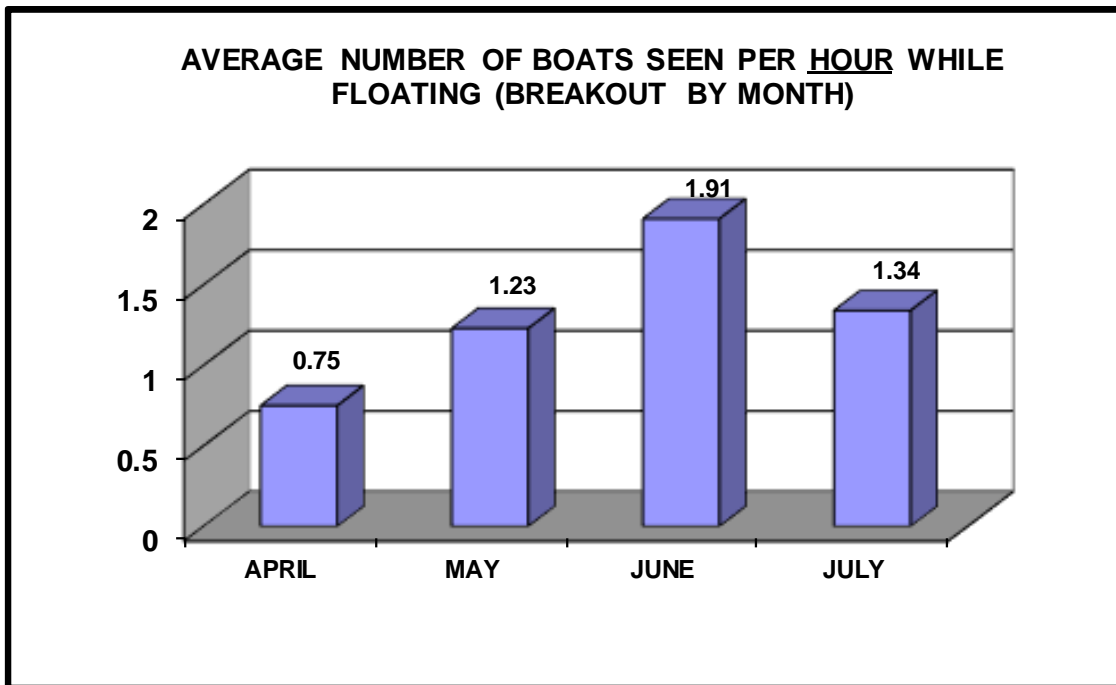

**GRAPH 5: PERCEPTION OF CROWDING BY ADJACENT BOAT CAMPS**

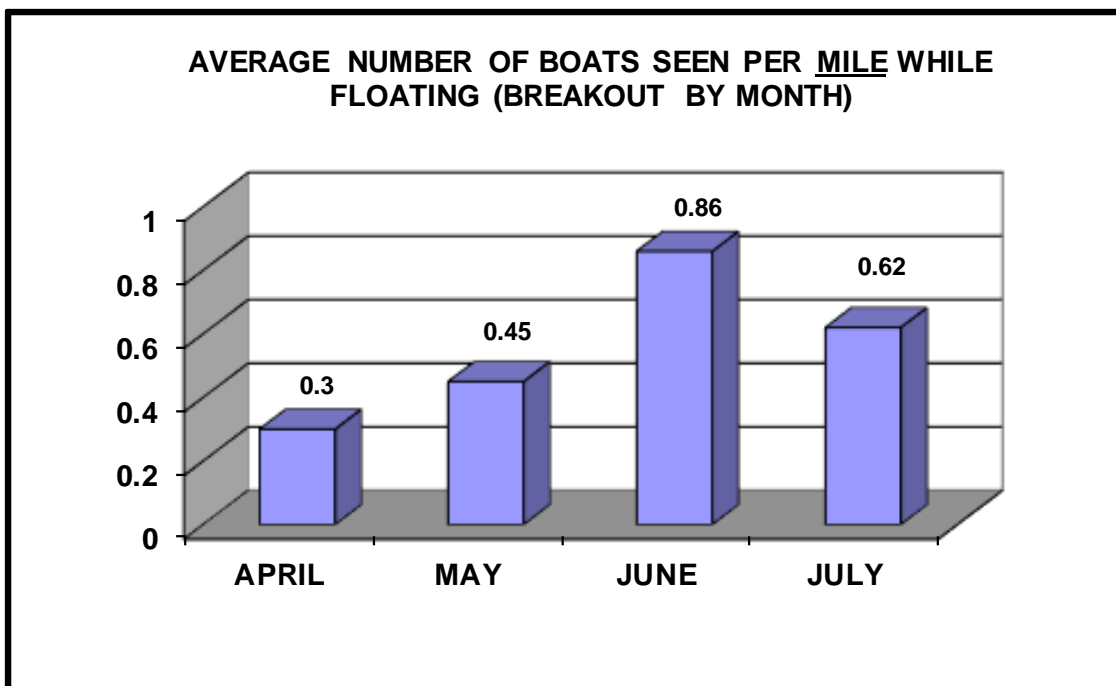

## FLOATING QUESTIONS:

**Question:** How many other **boats** did you observe while floating the river today (excluding your group)?

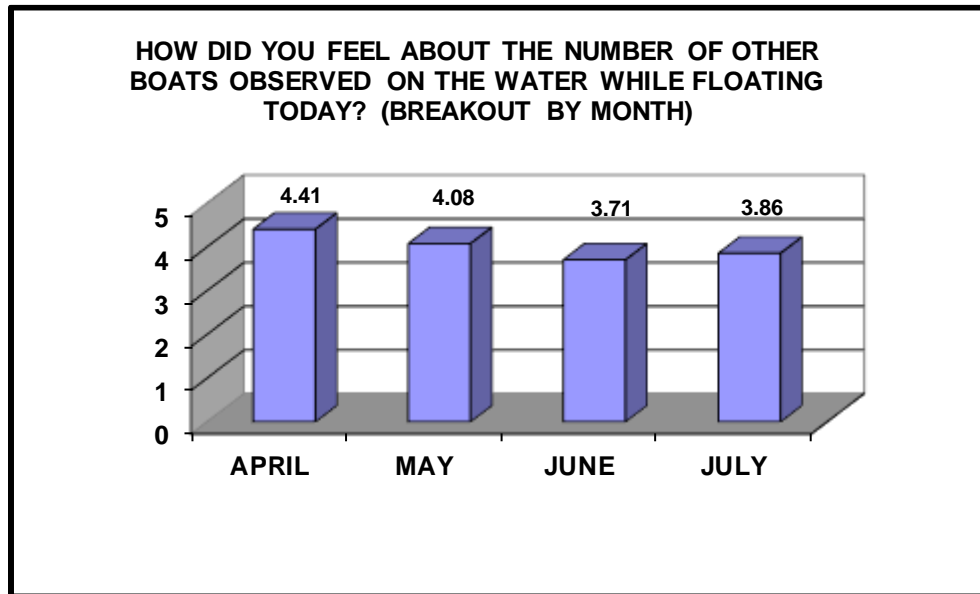

**GRAPH 6: FLOATER PERCEPTION OF NUMBER OF BOATS SEEN PER HOUR**

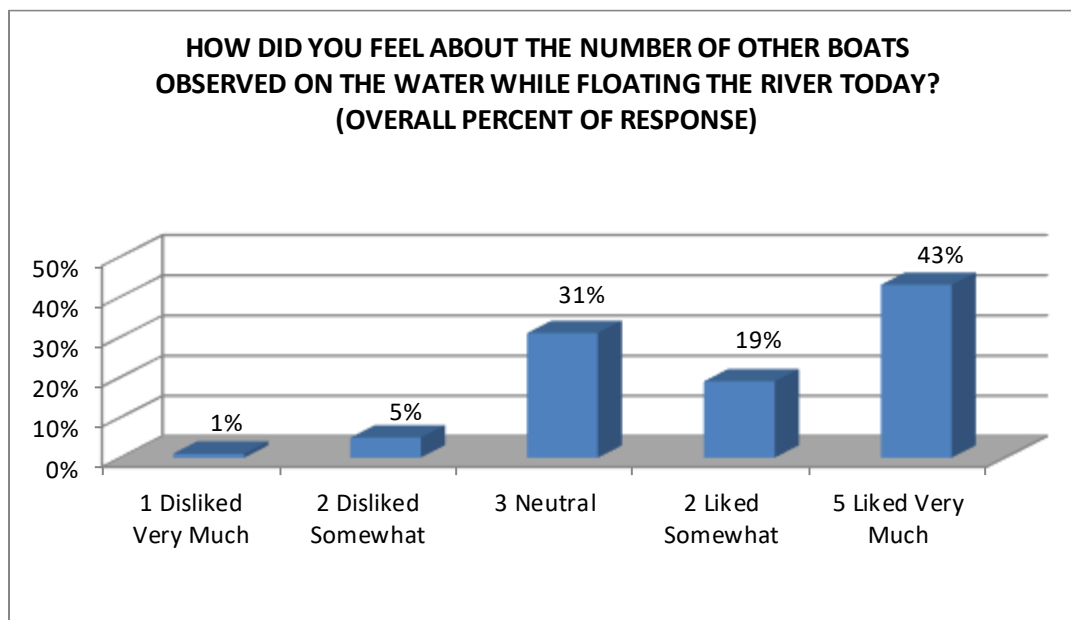

**GRAPH 7: FLOATER PERCEPTION OF NUMBER OF BOATS SEEN PER MILE**

**Question:** How did you feel about the **number** of other boats observed **on the water** while floating the river today?

Beginning in 2010, FWP implemented the new social indicator of encounters with other boats while on the river. This indicator has become the basis for assessing floater satisfaction with the overall level of solitude. The corresponding standard, that defines the appropriate satisfaction level with solitude, has not yet been determined.

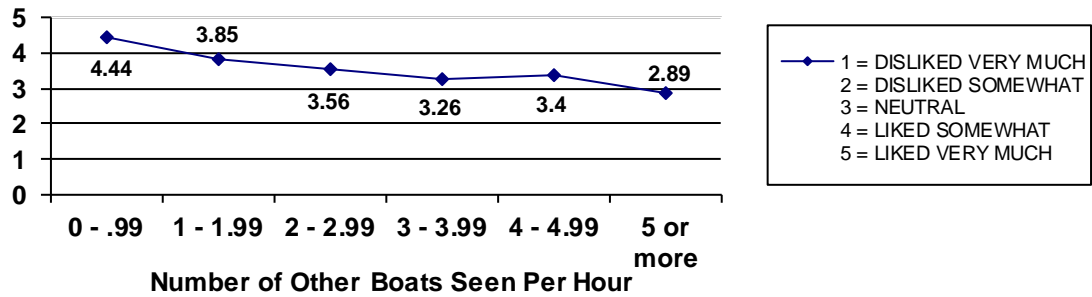

**GRAPH 8: FLOATER PERCEPTION OF NUMBER OF BOATS SEEN PER DAY**

**GRAPH 9: FLOATER PERCEPTION OF NUMBER OF BOATS SEEN PER DAY – OVERALL PERCENT OF RESPONSE**

**HOW DID YOU FEEL ABOUT THE NUMBER OF OTHER  
BOATS OBSERVED ON THE WATER WHILE FLOATING THE  
RIVER TODAY? (OVERALL RESPONSE - PER HOUR)**

\*Less than 10% of respondents reported seeing 3 or more boats per hour

**GRAPH 10: FLOATER PERCEPTION OF NUMBER OF BOATS SEEN PER DAY – OVERALL  
RESPONSE PER HOUR**

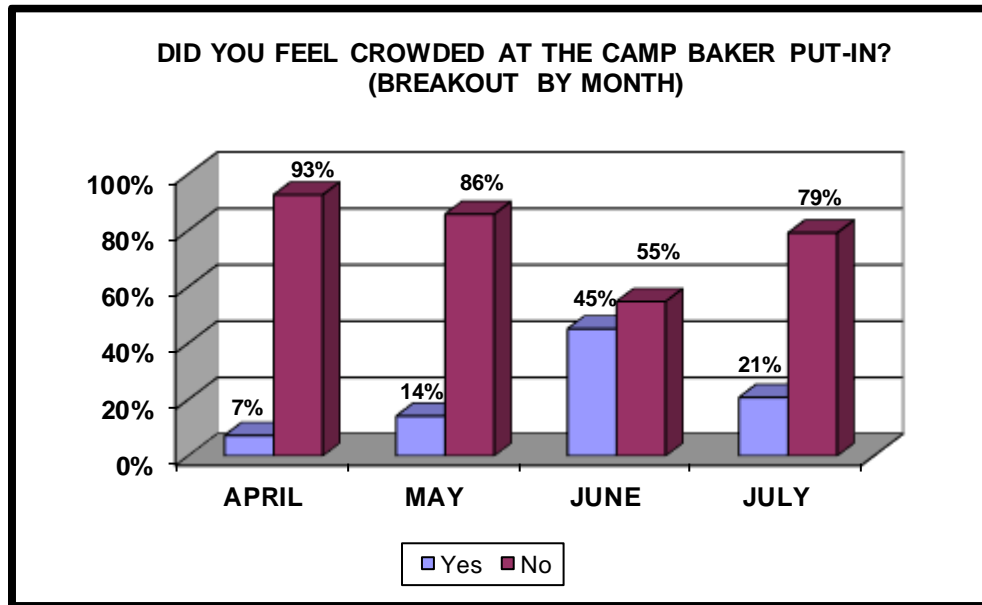

Written responses to questions 1, 2, 5 and 7 of the floater logs are contained verbatim in the 2019 Floater Log Comments document.

Trico Mist

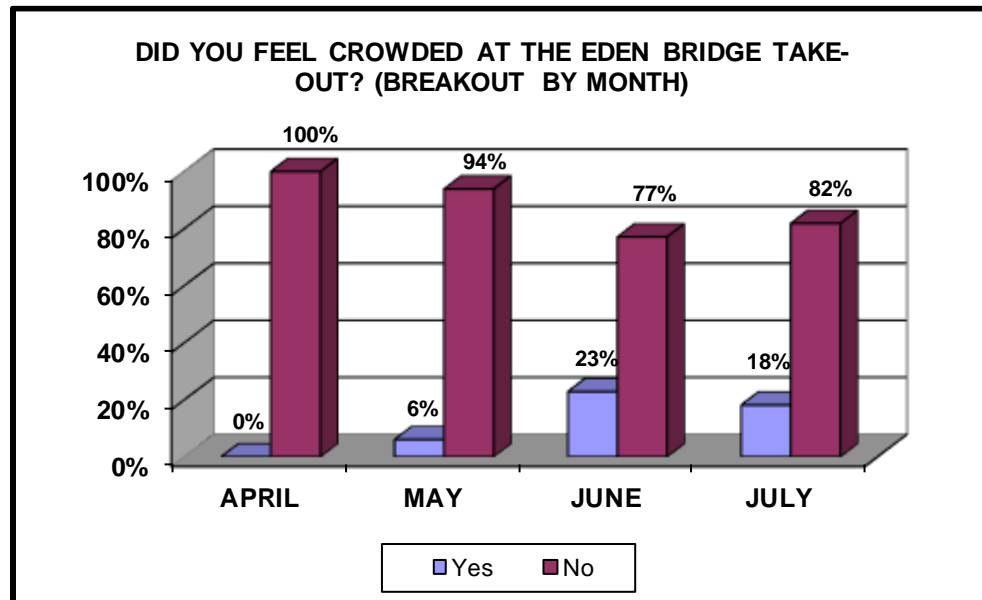

**Question #3: Did you feel crowded at the put-in? Yes or No**

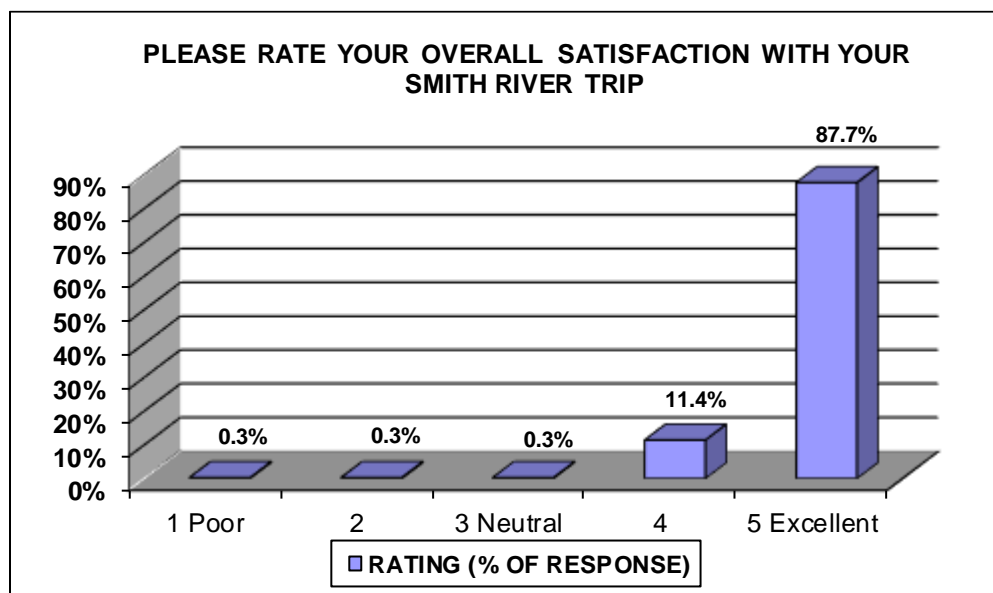

**GRAPH 11: FLOATER PERCEPTION OF FEELING CROWDED AT CAMP BAKER PUT-IN**

**Question #4: Did you feel crowded at the take-out? Yes or No**

**GRAPH 12: FLOATER PERCEPTION OF FEELING CROWDED AT EDEN BRIDGE TAKE-OUT**

**Question # 6: Please rate your overall satisfaction with your Smith River trip.**

**GRAPH 13: FLOATER OVERALL SATISFACTION WITH SMITH RIVER TRIP**

**Skyler "Shooter" Whitley's First Smith River Trout!**

SECTION 4 – RESOURCE AND SOCIAL CONDITIONS

River Flows

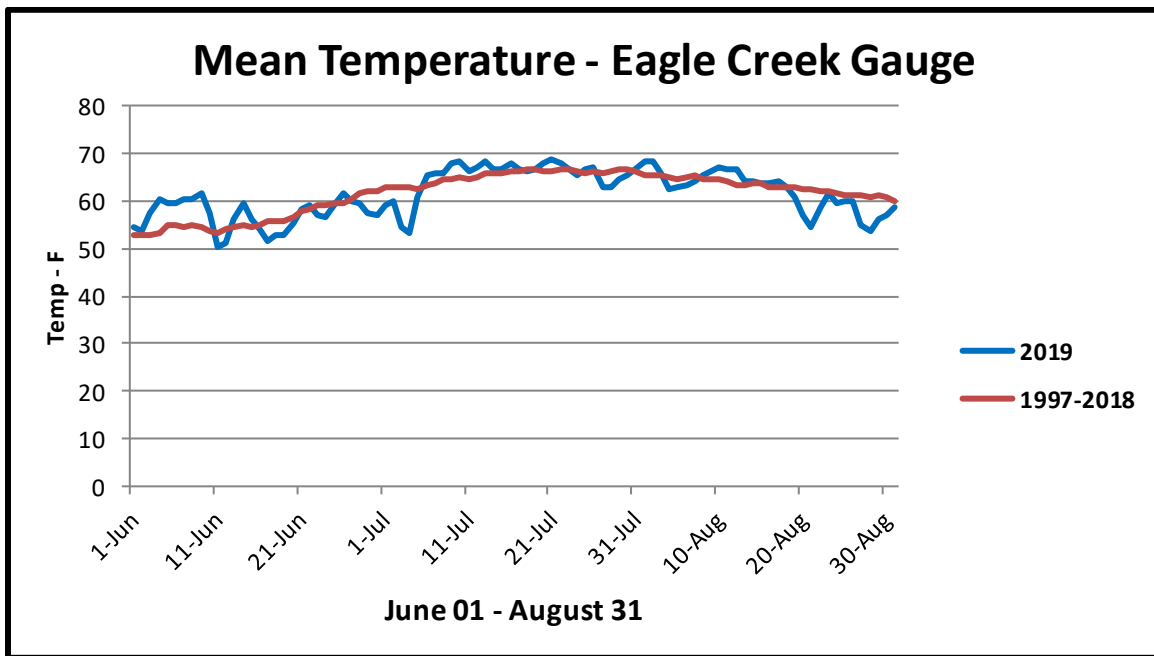

The lowest measured stream flow for the 2019 season was 108 cfs (September 05), while the peak stream flow was 1880 cfs (May 18). *High/Low flows represented as daily mean values.*
