Dear Interested Party:

Enclosed you will find a copy of Montana Fish, Wildlife & Parks (FWP) "2008 Stocking Plan". This plan lists the waters to be stocked in alphabetical order by region. This format will provide an easy way to find the information you are looking for. You are also encouraged to visit FWP's web site at fwp.mt.gov where you find information on fishing, hunting, parks, the stocking plan and much more related to Montana's great outdoors resources. To find the stocking plan on line go to <http://fwp.mt.gov/fishing/hatcheries/stockingPlans.html>.

This report lists the county, name of the water, the species and strain of fish, and the size and number to be stocked in each water. It also provides the name of the hatchery that will be doing the stocking and the source of the eggs used to provide these fish. Feel free to send any comments about this plan, the format, or changes that would make this more user friendly to, FWP Fisheries Division.

About Montana's Hatchery System

The propagation and stocking of fish has been a vital part of FWP activities since the early 1900s. The first State of Montana hatchery began operating in 1908 at what is now Washoe Park Trout Hatchery in Anaconda. Since that time, a number of hatcheries were built, and some of the smaller facilities were closed resulting in the ten hatcheries currently operated by the FWP. These nine hatcheries are located in, Anaconda, Arlee, Big Timber, Bridger, Eureka, Great Falls, Lewistown, Miles City, and Somer. The tenth is the state of the art facility near the town of Fort Peck. In 2005 the Fort Peck Multi-Species Hatchery became operational and has been in full production since 2006. You are always welcome to visit Montana's Fish Hatcheries and are encouraged to ask questions of FWP staff.

Montana is known for its naturally reproducing and quality fisheries. In those reservoirs and lakes where natural and native fish cannot sustain a fishery on their own, supplementation with hatchery fish provides the necessary numbers, species, and strains to augment those populations and provide fishing opportunities to all anglers. The hatchery system also produces fish that are used to restore native fish species such as pallid sturgeon and cutthroat trout. Today's modern hatchery system is vital in providing the necessary fish for fishery management throughout Montana.

Attached is a map showing the location of Montana's hatcheries. FWP invites you to visit one of these facilities and observe the hatchery system at work. They also provide guided tours for school and civic groups with advanced reservations.

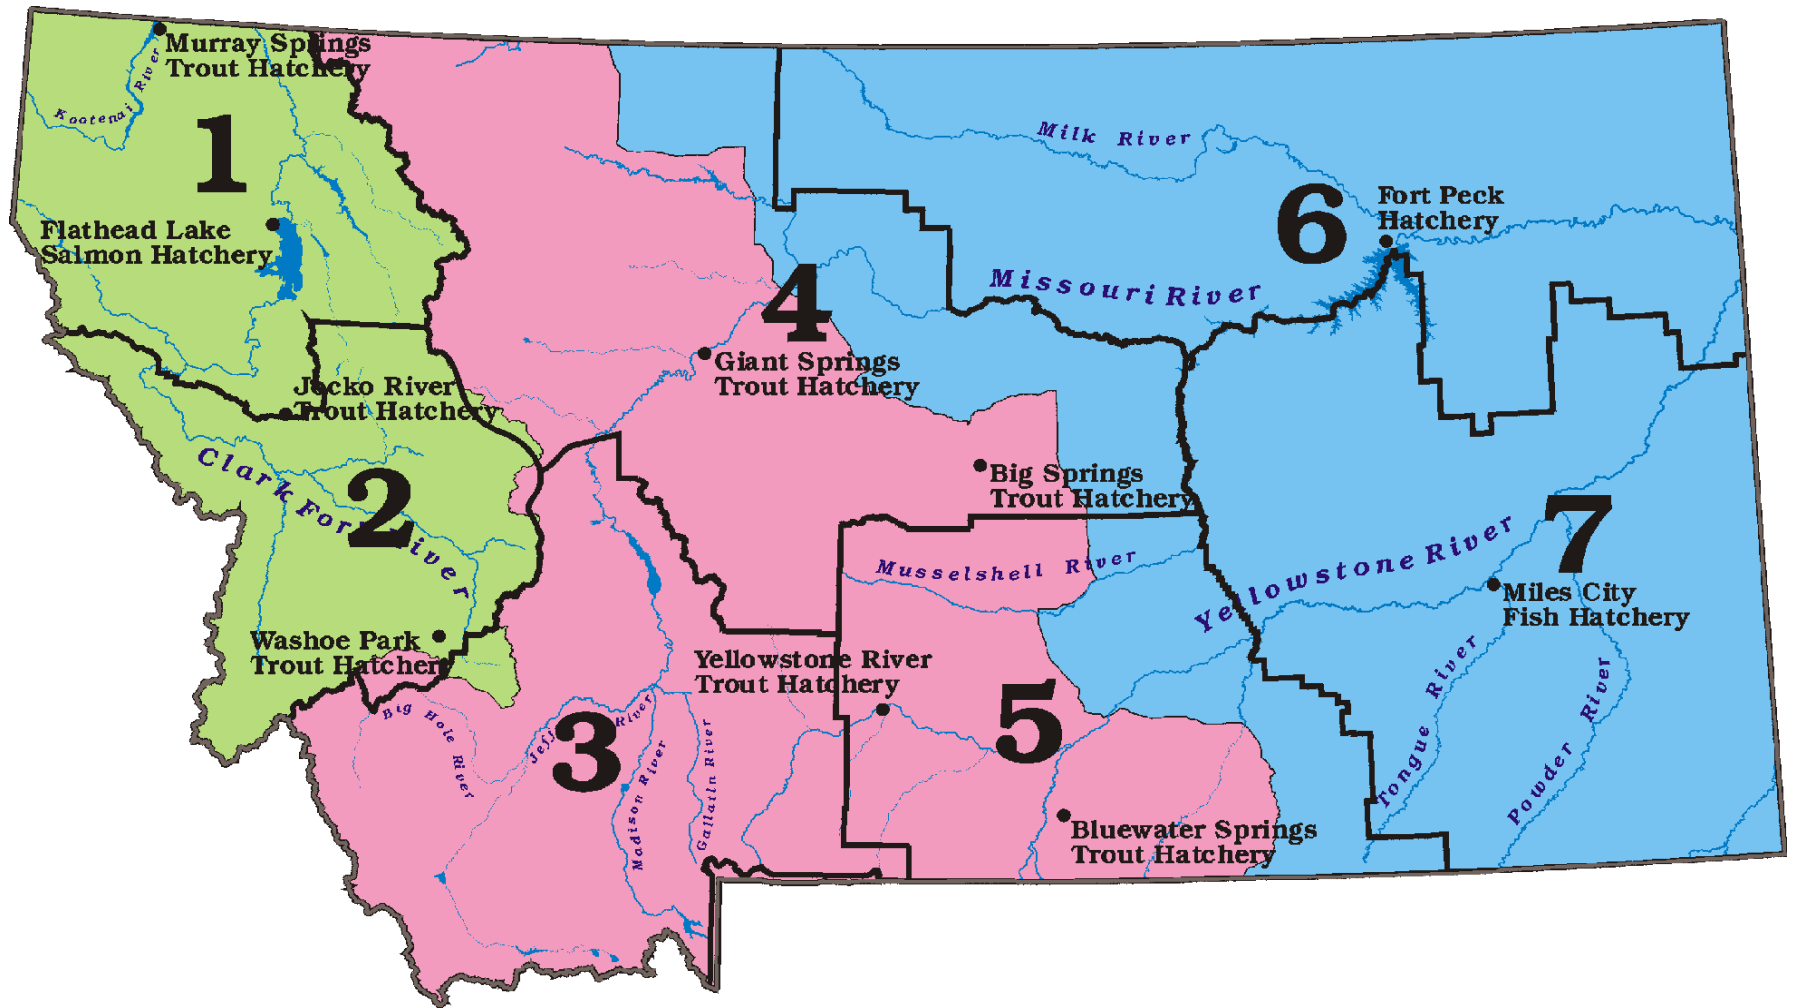

If you have any questions, suggestions, or comments regarding this stocking plan or the hatchery system in general, please contact the Fisheries office at 1-406-444-2449 or address noted above. Thank you for allowing FWP this opportunity to present information regarding one of FWP's important activities and it is hoped you go out and enjoy the great outdoor resources Montana has to offer.

Sincerely,
