

SCP-01-98
Report

To: Montana Fish, Wildlife, and Parks
From: Joseph Kozfkay and Dennis Scarnecchia
Address: University of Idaho
Dept of Fish and Wildlife Resources
Moscow, ID 83844
Subject: 1998 Fish Collection Report
Date: 9 April 1999

Collection Permit No. SCF-07-98 was granted to Dennis Scarnecchia and associates. This permit allowed the capture of 500 age-0 and 50 age-1 paddlefish from the Missouri River or Fort Peck Lake.

From 27 July through 23 September 1998, 186 age-0 and 27 age-1 paddlefish were captured from the upper portion of Ft. Peck Lake between the mouths of Beauchamp Creek and Squaw Creek. Of these fish, 77 age-0 and 8 age-1 paddlefish were killed and preserved for stomach content analysis. These specimens currently are stored in our laboratory at the University of Idaho.
