To Whom It May Concern:

I am writing to you today to report my activities in 1996 associated with my Scientific Collector's Permit #1405.

Two collections were made in 1996. The first was made on August 3. This collection consisted of six *Eucalia inconstans*, Brook Stickleback, captured by minnow trap in Len's Lake in Park County. These fishes were put on display at the International Fly Fishing Center (IFFC) where they are currently being displayed.

The second collection took place on August 5. This collection was made at Lake Josephine in Yellowstone County. This collection was made by hook and line and by seine net. The fishes captured on this trip are also currently being displayed at the IFFC in Livingston. The fish

captured were:	Green Sunfish	<i>Lepomis cyanellus</i>	2 specimens
	Pumpkinseed	<i>Lepomis gibbosus</i>	4 specimens

I hope this letter satisfies the reporting requirement of my permit. Please contact me if you need additional information.

Sincerely,

Bob Wiltshire

Director, International Fly Fishing Center
