

Figure 1. Population estimates of all trout 8 inches and greater per mile in the Smith River, Montana within the Eagle Creek (open bars) and County Line (black squares) sampling sections from 1969 through 2019. Long-term average number of total trout per mile at the Eagle Creek section is designated by the horizontal line. Estimates of total trout 8 inches and greater for 2019 for the Eagle Creek and County Line sections were 641 and 570, respectively.

Smith River - Eagle Creek Section

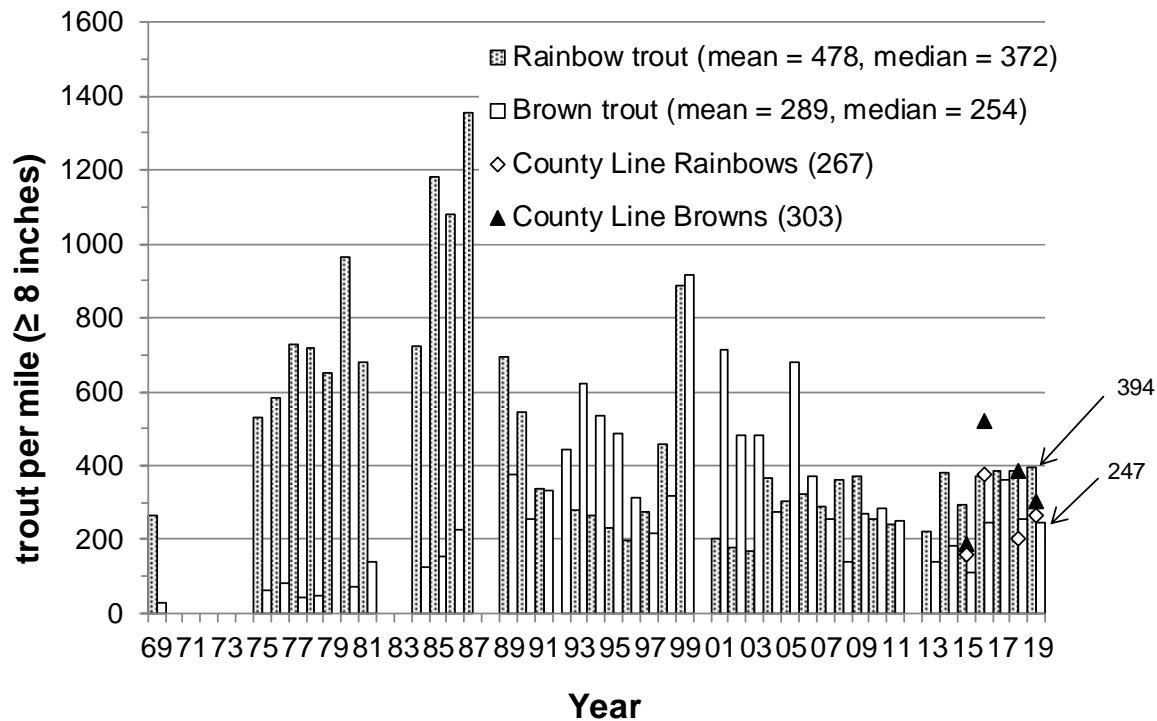

Figure 2. Population estimates of Rainbow Trout and Brown Trout 8 inches and greater per mile in the Smith River, Montana within the Eagle Creek (shaded and open bars) and County Line (open diamonds and black triangles) sampling sections from 1969 through 2019. Long-term average and median number of Rainbow Trout and Brown Trout per mile at the Eagle Creek section are shown in the legend. Estimates of Rainbow Trout and Brown Trout 8 inches and greater for 2019 for the Eagle Creek section were 394 and 247, respectively. Estimates of Rainbow Trout and Brown Trout 8 inches and greater for 2019 for the County Line section were 267 and 303, respectively.
