*Objective: Build agreement on the Council's vision, using the working group conversations as building blocks.*

*Review and discuss Working Group 2's Vision Statement, integrating elements from other working group discussions where possible.*

*Working Group 2's Vision:*

We envision fully recovered grizzly populations in the four MT ESA recovery zones and a landscape in between that facilitates physical connectivity. Meanwhile, we recognize that grizzlies may continue to expand outside of the connectivity area. Montana's capacity to accommodate this expansion will be limited in relation to available resources for management, education, infrastructure (e.g. transportation, sanitation), and capacity for supporting ranchers and farmers in prevention, timely conflict response, and mitigation. All those living or visiting in or near the connectivity area should expect to be impacted by the potential presence of grizzly bears, and should be able to access adequate education, assistance and resources to help address these impacts in a timely manner. In Montana, we envision that management decisions continue to be based in sound science that account for local resources, communities, and capacity.

*Guiding questions:*

- *What do you like about this Vision Statement?*
- *Is there anything missing from this Vision Statement that you think is critical?*
- *If you have concerns about the Vision Statement, what are they, and what alternative approach would you suggest for the Council's consideration?*
