

MONTANA DEPARTMENT OF FISH AND GAME
FISHERIES DIVISION
JOB PROGRESS REPORT

STATE: Montana TITLE: Southwestern Montana Fisheries Study
PROJECT NO.: F-9-R-22 TITLE: Lake and Stream Inventory
JOB NO.: I-a
PERIOD COVERED: July 1, 1973 to January 31, 1974

A series of gill nets were set in both Hebgen and Willow Creek Reservoirs to sample fish populations. Fish collected were weighed, measured and scale samples taken for age determination. Also, a partial creel census was taken to determine what species, size and age of fish were being caught by anglers.

The 1973 creel and gill net data will be compiled and presented in a future progress report.
